Overview

Efficient Electric Transport

This electric panel van is designed as a smart and reliable solution for urban logistics and commercial transport. Featuring an advanced ternary lithium battery and a low-noise electric motor, it offers a sustainable alternative to gasoline vehicles with up to 85% energy savings. Its versatile design allows for various modifications, making it suitable for cargo transport, delivery services, and other specialized applications.

Performance

Range

220 km
Range

Payload Capacity	600 kg
Total Mass	1850 kg

Technical Specs

Battery Technology	Ternary Lithium Battery
Motor Characteristics	Low noise electric motor

Features

Cargo Area Highlights

- Spacious cargo interior
- Durable diamond-patterned floor
- Safety metal partition cage
- Wide-opening rear doors

Suitable Applications

Cargo Van, Police Van, Post Van, Urban Logistics
