

Electric Passenger Tricycle

This electric tricycle has an enclosed passenger area with a windshield and roof. It is equipped with a headlight and rearview mirror for safe operation.

Overview

Electric Passenger Tricycle

This electric passenger tricycle is designed for efficient, short-range transport. Featuring an enclosed cabin with a clear windshield and roof, it provides passengers with protection from the elements while maintaining visibility. The vehicle is equipped with essential safety features, including headlights and rearview mirrors, making it a practical solution for urban passenger mobility or utility transport.
