Product Overview

Professional Electric Pasta Solution

This automatic electric pasta machine streamlines production by automating the rolling and cutting process with the touch of a finger. It includes specialized rollers for creating Fettuccine and Tagliolini efficiently, making it an ideal choice for high-demand environments. Designed with user safety at the forefront, the machine features an integrated safety cut-off system that halts operation when the cover frame is opened.

Technical Specifications

Power Performance

90 W

Motor Power

50 Hz

Minimum Frequency

60 Hz

Maximum Frequency

Input Voltage

- 120V
- 240V

Design and Customization
