

Electric Personal Transport Tricycle with Cargo Bed

This electric tricycle is designed for personal transportation and light cargo hauling. It features a step-through frame for easy access and a rear cargo bed.

Overview

Versatile Electric Personal Transport

This electric tricycle is engineered for efficient personal mobility and light-duty cargo hauling in urban or suburban environments. Featuring a user-friendly step-through frame design, it ensures easy accessibility for riders of all ages. The integrated electric motor provides reliable propulsion, while the rear cargo bed offers practical storage for daily errands or light transport tasks.

Technical Specifications

Safety Features

- Front headlight
- Backrest seat support
- Stable three-wheel geometry

Propulsion System	Electric Motor
Design Highlights	Step-through frame, Rear cargo bed, Integrated lighting

Usage & Application

Primary Use Cases

Personal Transport • Light Cargo Hauling • Urban Commuting
