

Electric Personal Transportation Scooter

This electric scooter is designed for personal transportation. It features a step-through frame and is powered by an electric motor.

Product Overview

Efficient Personal Mobility

The Eco-Scooter is a versatile electric personal transportation vehicle designed for daily commuting and efficient travel. Featuring a sturdy step-through frame, a comfortable black seat, and a durable silver-colored handlebar stem, it balances ergonomics with functionality. This electric-powered scooter is an ideal solution for professionals seeking a reliable, compact, and eco-friendly way to navigate urban environments.
