

Electric Planer Blade

This precision-engineered blade is designed for smooth and accurate material removal in electric planers. The sharp cutting edge provides clean, consistent results on wood and other materials, ensuring a professional finish.

Product Overview

Precision-Engineered Planer Blade

This electric planer blade is designed for smooth and accurate material removal, ensuring high-quality results. Manufactured from high-grade steel, it offers exceptional durability and an extended lifespan for demanding woodworking tasks. The sharp cutting edge delivers efficient planing with minimal chipping and tear-out, providing a professional finish on wood and various other materials.

Technical Specifications

Key Performance Features

- Precision fit for optimal performance
- Sharp cutting edge for efficiency
- Minimal chipping and tear-out
- Consistent material removal

Material	High-quality steel
Suitable Materials	Wood, General Materials
Compatibility	Various electric planers
