

Electric Power Cutter

This electric power cutter is designed for cutting various materials with precision. It features a robust motor, durable construction, and ergonomic handle for comfortable operation.

Product Overview

Professional Electric Power Cutter

This high-performance electric power cutter is designed for precision cutting across a variety of materials, including wood, metal, and construction supplies. Engineered with a robust motor and a durable construction, it features an ergonomic handle for operator comfort and an adjustable base plate for highly accurate cuts. It is an ideal solution for both professional construction sites and demanding woodworking or metalworking applications.

Certifications & Standards

International Certifications

ISO 9002, UL, GS, BS, CSA, CE, EMC

Key Features

Design Features

- Robust motor for high-performance cutting
- Durable construction for long-term reliability
- Ergonomic handle design for operator comfort
- Adjustable base plate for precision control
- Circular blade system

Applications

Suitable Applications

Construction • Woodworking • Metalworking • Professional Use • DIY Projects
