

Electric Power Drill

This is an electric power drill. It is used for drilling holes in various materials.

Overview

Professional Diamond Coring Drill

This electric power portable diamond coring drill is designed for precision cutting in concrete and masonry applications. Engineered for professional construction environments, it delivers the consistent power required for creating clean, accurate holes. Its portable design ensures versatility on job sites, making it an essential tool for drilling contractors and heavy-duty installation projects.

Technical Specifications

Primary Application	Concrete Core Drilling
Power Source	Electric
Tool Type	Diamond Coring Cutting Drill

Features

Key Features	Portable, Diamond Coring, Concrete Cutting, Electric Powered
