

# Electric Power Drill 450W

This electric drill is a versatile power tool suitable for various drilling applications. It has a 450W motor, a no-load speed of 0-2500 rpm, and supports dual voltage operation at 110V/220V.

## Product Overview

### Professional Electric Power Drill

This versatile 450W electric power drill is designed to handle a variety of drilling tasks with precision and reliability. Featuring an adjustable no-load speed of up to 2500 RPM, it offers excellent control for different material densities. Its dual-voltage compatibility ensures it remains a dependable tool across diverse international power infrastructures.

## Performance Specifications

### Rated Input Power

**450 W**

Rated Power

### No-Load Speed

0-2500 rpm

## Drilling Capacity

### Material Drilling Capacity

Material	Max Diameter
Steel	10mm
Wood	25mm

## Electrical Specifications

Supported Voltage: 110V, 220V

Operating Frequency: 50/60 Hz
