

Electric Power Drill 460W

This electric drill features a robust design suitable for various drilling tasks. It can drill up to 10mm diameter holes in steel and 25mm diameter holes in wood.

Product Overview

Professional Drilling Performance

This 460W electric power drill is engineered for versatility and reliability in various professional drilling applications. Featuring a robust motor, it offers a variable no-load speed of up to 2200 revolutions per minute for precise control. Designed to handle demanding tasks, it supports drilling diameters of up to 10mm in steel and 25mm in wood, making it an essential tool for workshop and field use.

Technical Specifications

Power & Performance

460 W Rated Input Power	2200 r/min Max No-Load Speed
-----------------------------------	--

Drilling Capacity

Material	Max Diameter
Steel	10mm
Wood	25mm

Electrical Requirements

Voltage & Frequency	110V/220V, 50Hz/60Hz
---------------------	----------------------
