

Electric Power Drill for Heavy-Duty Applications

This is a professional-grade electric power drill designed for heavy-duty applications. It features a robust motor, adjustable speed settings, and ergonomic grip for comfortable operation, suitable for drilling into wood, metal, and concrete.

Product Overview

Industrial Performance

This professional-grade electric power drill is engineered to handle demanding heavy-duty applications across diverse materials including wood, metal, and concrete. Featuring a robust motor and adjustable speed settings, it provides the versatility required for intensive project environments. The design prioritizes operator comfort and stability with an ergonomic grip and a secondary side handle for maximum control.

Technical Specifications

Primary Equipment Features

- Robust heavy-duty motor
- Adjustable speed control
- Ergonomic handle design
- Secure-retention chuck
- Secondary side handle for control

Suitable Materials

Wood, Metal, Concrete
