

Electric Power Drill with 10mm Steel Capacity

This electric power drill is suitable for drilling into both steel and wood. It has a drill capacity of 10mm for steel and 25mm for wood.

Overview

Versatile Power Drilling

This electric power drill is engineered for precision and efficiency in both metal and woodworking applications. With a robust 400W motor and a variable speed range up to 2300 RPM, it offers the control necessary for professional-grade tasks. Its compact design and dual-voltage compatibility make it a reliable choice for diverse workshop environments.
