

Electric Power Polisher with Variable Speed

This electric polisher features variable speed settings for diverse applications. It is designed for automotive detailing, woodworking, and metal polishing, providing a swirl-free finish.

Product Overview

Professional Grade Power Polisher

This electric power polisher is engineered for versatility and precision in automotive detailing, woodworking, and metal finishing tasks. Featuring a durable motor and variable speed settings, it allows operators to adjust performance for specific surface requirements. The inclusion of an auxiliary handle ensures improved control and stability, helping users achieve a consistent, swirl-free finish on a variety of materials.

Technical Specifications

Control Features

- Variable speed settings
- Auxiliary handle for stability
- Large polishing pad surface

Performance Highlights

1 Swirl-free
Finish Quality

Primary Applications

Automotive Detailing, Woodworking, Metal Polishing
