

Electric Power Polisher with Variable Speed Control

This electric power polisher is designed for polishing and buffing applications. It features a robust motor for consistent performance and a comfortable grip for extended use.

Product Overview

Professional Electric Power Polisher

This high-performance electric power tool is engineered for precision polishing and buffing applications. Designed with a robust motor and variable speed control, it allows users to adapt seamlessly to various materials and surface finishes. The ergonomic grip ensures comfort during extended use, making it an ideal solution for automotive detailing, woodworking, and demanding surface finishing tasks.

Certifications & Standards

International Certifications

ISO 9002, UL, GS, BS, CSA, CE, EMC

Key Features

Performance Features

- Variable speed control for material adaptability
- Robust motor for consistent performance
- Large polishing pad for efficient coverage
- Ergonomic grip design for extended operation
- Durable construction for demanding environments

Applications

Recommended Use Cases

Automotive Detailing • Woodworking • Surface Finishing
