

Electric Power Polisher with Variable Speed

This electric power polisher is designed with a large circular polishing pad and a top handle for enhanced control. It features a robust motor housing and an ergonomic grip, ensuring comfortable operation during extended use.

Overview

Professional Electric Power Polisher

This electric power polisher is designed for high-performance surface finishing in automotive detailing and woodworking applications. Featuring a robust motor housing and an ergonomic grip, it ensures comfortable operation during extended use. The integrated variable speed dial allows for precise control, making it an essential tool for achieving professional-grade results on various surfaces.

Technical Specifications

Speed Control	Variable speed dial
Design Features	Ergonomic Grip, Top Control Handle, Robust Housing

Applications

Primary Applications

- Automotive Detailing
- Woodworking
- Surface Polishing
