

Electric Power Trowel for Concrete Finishing

This power trowel is designed for smoothing and finishing concrete surfaces. It utilizes a rotating blade system enclosed within a safety cage and is powered by an electric motor.

Overview

Professional Concrete Finishing

This electric power trowel is engineered for high-efficiency smoothing and finishing of concrete surfaces. Featuring a robust rotating blade system enclosed within a protective safety cage, it ensures consistent results while maintaining operator safety. The unit is powered by a reliable electric motor and includes an ergonomic handle for precise control and maneuverability across various job sites.

Technical Specifications

Primary Application

Concrete Finishing • Surface Smoothing

Power Source	Electric Motor
Safety Features	Safety Cage, Operator Control Handle
