

Electric Powered All-Terrain Vehicle

This electric-powered all-terrain vehicle is designed for recreational use. It features front and rear suspension for a smooth ride on various terrains and a reliable braking system.

Overview

Electric Powered All-Terrain Vehicle

The SX-E 350ATV-A is a high-performance electric all-terrain vehicle engineered for recreational off-road use. Featuring a robust frame and durable tires, it delivers a smooth and comfortable ride across various terrains thanks to its advanced front and rear suspension system. Designed with safety in mind, it includes a reliable braking system and a speed limiter, making it an ideal choice for beginner riders seeking a quiet, efficient, and fun outdoor experience.
