

Electric Powered Forklift for Material Handling

This electric powered forklift is designed for material handling in warehouses and factories. It features a compact design for maneuverability and a high-capacity battery for extended operation.

Product Overview

Industrial Material Handling Solution

This electric-powered forklift is engineered for efficient material handling in warehouses, factories, and industrial environments. It features a compact design optimized for maneuverability in tight spaces, supported by a high-capacity battery for extended operational uptime. Built for reliability, it includes a sturdy mast for lifting heavy loads and essential safety features such as integrated lighting, mirrors, and operator protection.

Operational Capabilities

Lifting Capacity	16 tons
Operational Environment	Indoor, Outdoor, Paved Surfaces, Warehouse, Factory

Design & Safety

Safety Equipment

- Integrated safety lights
- Rearview mirrors
- Operator protection system

Design Type

Electric Powered • Compact Design
