

Electric Powered Four-Wheel ATV

This electric quad ATV is powered by an electric motor. It has a robust frame, knobby tires, a comfortable seat, and front headlights.

Overview

Eco-Friendly Off-Road Performance

The ATV-3E is a modern all-electric four-wheel quad designed for green environmental protection and quiet operation. Powered by an 800W motor, it offers flexible speed control and a robust build suitable for off-road environments. This vehicle combines the thrill of a motorcycle with the stability of a four-wheel design, making it an excellent choice for sustainable outdoor mobility.
