

Electric Powered Street Motorcycle

This is an electric motorcycle designed for street use. It offers a silent and emission-free riding experience.

Product Overview

High-Performance Electric Mobility

This electric powered street motorcycle is engineered for urban commuting and efficient short-to-mid range travel. It features a modern electric drivetrain that delivers instant torque while ensuring a whisper-quiet ride and zero tailpipe emissions. Designed with professional performance and ergonomics in mind, it provides a cost-effective and environmentally friendly transportation solution for modern business fleets.

Technical Specifications

Performance Highlights

120 km/h

Top Speed

150 km

Range per Charge

5 hours

Charging Time

Power Source

High-capacity Lithium-ion battery pack

Drive System

Brushless DC Motor

Certifications & Standards

Industry Certifications

CE, ISO 9001, EEC Approved

Design & Ergonomics

Key Features

- Digital instrument cluster
- LED daytime running lights
- Regenerative braking system
- Anti-theft steering lock
