

# Electric Powered Wheelbarrow

This battery-powered wheelbarrow is designed to assist with heavy lifting and transportation tasks. It features a robust steel frame, a large pneumatic tire for smooth maneuverability, and a powerful electric motor powered by a rechargeable battery.

## Product Overview

### Heavy-Duty Electric Assistance

This battery-powered wheelbarrow is engineered to streamline heavy lifting and material transportation tasks across demanding environments. Featuring a robust steel frame and a durable blue powder-coated cargo bed, it provides excellent corrosion resistance and long-term reliability. The integrated electric motor and rechargeable battery system are safely enclosed in a protective housing, ensuring consistent performance for construction, landscaping, and agricultural applications.

## Technical Specifications

### Mobility Features

- Large pneumatic tire
- Auxiliary caster wheel

Frame Material	Steel
Finish	Blue powder-coated
Power Source	Rechargeable Battery

## Applications

Ideal Industries	Construction, Landscaping, Agriculture
