

Electric Pressure Cooker for Food and Beverage Processing

This electric pressure cooker is designed for food, beverage, and cereal processing. It features automated controls and a durable stainless steel build for efficient cooking.

Product Overview

Industrial Efficiency

This electric pressure cooker is engineered for high-performance food and beverage processing, including cereal preparation. Constructed with a durable stainless steel body, it offers reliable, automated cooking cycles suitable for commercial environments. The intuitive control interface allows for precise management of cooking times, ensuring consistent results across batches.

Technical Specifications

Model Number	YDB60-100K4
Body Material	Stainless Steel

Operations

Available Modes

Cook • Warm

Automation

- Automated cooking cycles
- Indicator lights for mode status

Control Type	Manual Control Knob
