

Electric Pressure Cooker for Food and Beverage Processing

This automatic electric pressure cooker is designed for food, beverage, and cereal processing. It features automated pressure control for consistent results and efficient operation.

Product Overview

Industrial Electric Pressure Cooker

This automatic electric pressure cooker is engineered for high-efficiency food and beverage processing, including cereal preparation. It features automated pressure control to ensure consistent results across production batches. Designed for durability, the unit includes intuitive controls such as a timer dial and clear status indicators, making it a reliable asset for professional food processing environments.

Technical Specifications

Status Indicators

Cook • Warm

Model Number	YDB60-100C
Control System	Automatic Pressure Control, Manual Timer Dial

Application

Processing Applications

- Food Processing
- Beverage Production
- Cereal Processing
