

Electric Pressure Cooker with Digital Display

This electric pressure cooker offers versatile cooking options with its multiple programs. It features a digital display for precise time and temperature control, along with safety features like a pressure release valve and automatic shut-off.

Product Overview

Professional Electric Pressure Cooker

The YB50-90A02 is a high-performance electric pressure cooker engineered for commercial and efficient home kitchens. It integrates precise digital time and temperature management with a rugged, food-grade stainless steel inner pot for consistent results. Designed with safety as a priority, this unit includes automated pressure release systems and safety shut-off protocols for reliable daily operation.

Technical Specifications

Cooking Programs

- Multi-program settings
- Precise temperature control
- Digital time management

Safety Compliance

Pressure Safety Valve • Automatic Safety Cut-off

Model Number

YB50-90A02

Key Features

Digital Display, Automatic Shut-off, Pressure Release Valve, Stainless Steel Inner Pot
