Overview

Versatile Electric Pressure Cooking

This electric pressure cooker is designed for modern kitchens, offering both digital touch-panel and mechanical knob control options to suit different user preferences. With a 2.5L capacity and 650W of power, it efficiently handles a variety of cooking tasks using its 1.8mm maifanite inner pot. Safety is prioritized through a one-click pressure release design and detachable lid, while the curved heating plate ensures thermal efficiency and long-term durability.
