Overview

Professional Pump Protection

This electronic controller is engineered to provide essential automation and protection for electric pump systems. It features integrated safeguards against dry running, which helps prevent pump damage and ensures long-term operational reliability. Built with a durable ABS housing, this compact device is designed for seamless integration into professional pumping installations.

Electrical Specifications

Power Supply	110/230 V
Frequency	60 Hz
Maximum Current	10 A

Performance

Maximum Pressure	10 bar
Protection Features	Dry Running Protection

Physical Characteristics

Dimensions

Dimension	Value (mm)
Height (Top)	100
Height (Bottom)	120
Width	148

IP Rating

IP54

Housing Material

ABS Plastic

Interface & Controls

Interface Elements

- Reset Button
- Line Status LED
- Failure Status LED

Compliance

Certifications

CE, TUV
