

Electric Pump for Fluid Transfer

This electric pump is designed for various industrial and general-purpose applications. It is engineered for efficient fluid transfer and reliable operation.

Product Overview

High-Performance Fluid Transfer

The KF Series electric pump is a high-performance solution designed for versatile industrial and general-purpose applications. Engineered for efficient fluid transfer, it ensures reliable operation and long service life. Its robust construction makes it an ideal choice for demanding tasks such as water circulation and pressure boosting.

Technical Specifications

Suitable Applications	Water Circulation, Pressure Boosting, General Fluid Handling
Construction Quality	Yes
