

Electric Radiant Space Heater

This electric radiant heater provides focused warmth with its radiant heating technology. It features a protective metal grill and a compact design suitable for various indoor spaces.

Product Overview

Efficient Radiant Heating Solutions

This electric radiant space heater is engineered to provide focused, immediate warmth for professional and residential environments. Featuring a robust black and silver frame with a protective metal grill, it balances durability with a compact, space-saving design. It is an ideal solution for supplemental heating needs where directional and efficient thermal output is required.

Technical Specifications

Key Operational Benefits

- Directional heating output
- Compact design for easy placement
- Sturdy base for safety

Heating Method	Radiant Heat
Construction Details	Metal Protective Grill, Black and Silver Finish, Compact Form Factor
Stability	Yes
