

Electric Radiator with Digital Control

This electric radiator offers a slim and efficient heating solution suitable for various environments. It uses convection heating and features a digital control panel and programmable timers.

Overview

Efficient Heating Solution

The FDG4 electric radiator is a slim and efficient heating solution designed for both residential and commercial applications. It utilizes advanced convection heating to ensure even warmth distribution throughout any room. With precise digital controls and programmable timers, it offers significant energy savings and operational flexibility.

Technical Features

Heating Method	Convection
Control Interface	Digital Control Panel
Safety & Protection	Low Surface Temperature, Frost Protection

Installation & Design

Mounting Options

- Wall-mounted
- Optional floor stands

Design	Slim profile
