Overview

High-Efficiency Electric Reach Stacker

This electric reach stacker is engineered for precise material handling in warehouses and industrial environments. It features a compact structure with a low center of gravity, ensuring stability and maneuverability in narrow aisles. Equipped with a vertical driving wheel and a tilting fork system, it offers superior driving efficiency and ease of loading, making it an ideal solution for optimizing operational productivity.

Performance

Lifting Capacity

1.6 ton
Capacity

Key Features

Vertical Driving Wheel, Tilting Forks, Compact Design, Low Gravity Center

Operational Details

Operation Type

Electric

Maintenance

Easy installation and maintenance design
