

# Electric Rebar Bending Machine

The electric rebar bender is designed for bending rebar in construction and industrial applications. It features dual foot pedal controls and a control panel for setting bending angles.

## ADDITIONAL IMAGES

## Overview

### Professional Rebar Bending Solution

This electric rebar bending machine is engineered for high-efficiency performance in construction and industrial engineering applications. It offers a safe, spark-free, and low-noise operation, making it suitable for demanding job sites. With precise angle controls and hands-free foot pedal operation, it ensures consistent results for varied rebar diameters.

## Performance Metrics

### Bending Capacity

**25 mm**

Max Rebar Diameter

**6 mm**

Min Rebar Diameter

### Bending Angle Range

0-180 degrees

## Technical Specifications

### Power Requirements

- Voltage: 110V/220V/230V
- Wattage: 1440W - 1700W

### Weight Specifications

| Type           | Weight |
|----------------|--------|
| Machine Weight | 91     |
| Gross Weight   | 109    |

### Package Dimensions

500 x 555 x 505 mm

## Features

### Compliance

CE Certified

### Safety & Control

Foot Pedal Control, Emergency Stop, Overload Protection, Spark-free Operation, Low Noise
