

# Electric Rebar Bending Machine

This electric rebar bender is designed for bending rebar with precision and efficiency. It is available in two models, BRB-25 and BRB-32, catering to different bending requirements.

## ADDITIONAL IMAGES

## Overview

### High-Efficiency Electric Rebar Bending Solutions

This electric rebar bending machine is a robust tool engineered for precision and efficiency on construction sites. Available in two versatile models, the equipment supports rebar diameters up to 32mm and features an adjustable bending range from 0 to 180 degrees. Designed for safety and ease of use, it incorporates an emergency stop button, pedal switch compatibility, and precise angle adjustments to streamline complex bending tasks.

## Performance Metrics

### Key Performance Metrics

**1600 W**

Motor Power (BRB-25)

**2000 W**

Motor Power (BRB-32)

**5 s**

Bending Speed (BRB-25)

**7 s**

Bending Speed (BRB-32)

## Technical Specifications

### Comparison Table

Feature	BRB-25	BRB-32
Max Bending Diameter	25mm	32mm
Weight	90kg	112kg
Packing Size	510x500x610mm	550x530x640mm
Supported Bending Angles	45°, 90°, 135°, 180°	

## Safety and Features

### Standard Features

- Emergency stop button
- Angle adjust handle
- Pedal switch integration
- Proper grounding requirement
