Overview

Professional Electric Rebar Cutter

This heavy-duty electric rebar cutting machine is engineered for high-performance use in construction and metalworking environments. It is designed to efficiently process carbon steel rebar, hot-rolled bars, screw bars, square bars, and flat bars. Built for durability and reliability, the unit features a copper motor and high-grade 9CrSi blades, ensuring precise cuts and long-lasting operation in demanding project workshops.

Key Features

Construction Quality

1.40CrMoC Gear (10-year lifespan), Quenched and Tempered Shell, Solid Shell Head, Copper Motor, 9CrSi Blades

Technical Specifications

Cutting Capacity by Model

Specification	GQ40	GQ45	GQ50	GQ55
Plain Bar	16-140	16-145	16-150	16-150
II Class Reinforced Rebar	16-132	16-132	16-140	16-140
Flat Steel (mm)	<70*15	<70*15	-	-
