

Electric Reciprocating Saw

This electric reciprocating saw utilizes a push-and-pull motion of the blade for cutting. It is suitable for demolition work, pipe cutting, and general wood and metal cutting.

Overview

Versatile Cutting Power

This electric reciprocating saw utilizes a powerful push-and-pull blade motion to handle demanding cutting tasks with ease. Designed for professional use, it features variable speed control that allows for precision across various materials including wood and metal. Its ergonomic construction ensures operator comfort during long demolition sessions or pipe cutting applications, while the tool-free system minimizes downtime during blade changes.

Key Features

Design Advantages

- Robust high-performance motor
- Variable speed control
- Tool-free blade change system
- Ergonomic handle for extended use

Capabilities

Demolition, Pipe Cutting, Metal Cutting, Wood Cutting
