

Electric Rescue Boat Winch 55KN

This electric winch is designed for rescue boat applications. It features a robust construction with a geared motor for reliable and controlled hoisting and lowering.

Product Overview

Electric Rescue Boat Winch

This heavy-duty electric winch is engineered specifically for rescue boat applications, offering reliable hoisting and lowering capabilities in demanding marine environments. Built with a robust geared motor and integrated safety features, including braking mechanisms and overload protection, it ensures precise control during critical operations. The system is designed for durability and efficiency, making it an essential component for safe boat handling.

Performance Metrics

Working Load

50 KN

Working Load

Wire Speed (Lifting)

36 m/min

Technical Specifications

Wire Diameter	16 mm
Drum Capacity	55 m
Motor Power	22.5/10.6

Certifications

Classification Society Compliance	CCS, LR, GL, RS
