

Electric Rice Cooker with Non-Stick Pot

This electric rice cooker is designed for household use. It features a non-stick inner pot and an automatic keep-warm function.

Product Overview

Professional Commercial Rice Cooker

This high-capacity electric rice cooker is engineered for demanding commercial environments such as hotels and canteens. With a versatile capacity range of 8 to 23 liters, it is designed to efficiently serve between 10 and 50 people. The unit features a durable non-stick inner pot and a high-intensity magnetic control switch, ensuring reliable performance and consistent cooking results.
