

Electric Rice Cooker with Non-Stick Pot

This electric rice cooker is designed with a full plastic body, cover, and base. It features an automatic cook and keep warm function and includes a food-safe non-stick coating.

Overview

Efficient Cooking Solution

This electric rice cooker features a durable full plastic body designed for both efficiency and convenience in the kitchen. It is equipped with an automatic cooking and keep-warm function to ensure rice stays at the perfect temperature. The food-safe non-stick coating makes cleaning effortless, while the compact design and sturdy carrying handle allow for easy portability.
