

Electric Rice Cooker with Purple Clay Inner Pot

This electric rice cooker features a purple clay inner pot made under high temperatures to withstand sudden temperature changes. Its hermetic heating structure ensures high thermal efficiency, boiling water in approximately 45 minutes, with 12 function options.

Product Overview

Premium Purple Clay Cooking Experience

This electric rice cooker features a specialized purple clay inner pot, crafted at 1300°C to ensure superior durability and resistance to thermal shock. Designed with a hermetic heating structure, it maximizes thermal efficiency, allowing for rapid water boiling in under 45 minutes. With 12 versatile functions, this appliance is engineered to accommodate a wide variety of dietary needs and cooking styles.

Technical Specifications

Boiling Time

45 min

Water Boiling Time

Inner Pot Material	Purple Clay
Firing Temperature	1300 °C

Features

Heating Technology

Hermetic Heating Structure • High Thermal Efficiency

Cooking Functions	12
