

Electric Rotary Fabric Cutter

The electric rotary fabric cutter is a powerful and efficient tool for cutting multiple layers of fabric. It features a high-speed rotating blade that effortlessly slices through various materials.

Product Overview

Professional Electric Rotary Fabric Cutter

This powerful and efficient electric rotary fabric cutter is designed to streamline production in garment manufacturing, upholstery, and textile industries. Featuring a high-speed rotating blade, it effortlessly slices through multiple layers of various materials, including cotton, linen, silk, and synthetics. The unit combines an ergonomic design for reduced operator fatigue with an adjustable blade guard for enhanced safety and a built-in sharpening mechanism for consistent, clean, and accurate cuts.

Technical Features

Key Features

- High-speed rotating blade
- Multi-layer cutting capability
- Ergonomic handle design
- Adjustable safety blade guard
- Built-in blade sharpening mechanism

Supported Materials

Cotton, Linen, Silk, Synthetics
