

Electric Rotary Fabric Cutter

This electric rotary cutter is designed for cutting fabric and other materials. It is suitable for cutting through multiple layers of fabric with precision and ease.

Overview

Professional Electric Rotary Fabric Cutter

This portable electric rotary cutter is engineered for high-precision fabric cutting in textile manufacturing, sewing, and crafting environments. Featuring a circular blade enclosed within a protective guard, it ensures safety while delivering clean cuts through multiple layers of fabric. The ergonomic handle design allows for comfortable, extended use, making it an essential tool for streamlining production workflows.

Technical Specifications

Power Source	Electric (Corded)
Blade Type	Circular Rotary Blade
Safety Features	Protective Guard, Ergonomic Grip

Application

Ideal Applications

- Textile Manufacturing
- Professional Sewing
- Crafting Applications
- Multi-layer Fabric Cutting
