

# Electric Rotisserie Oven with Adjustable Temperature

This electric oven features a rotisserie function, ideal for roasting poultry and other meats. It includes adjustable temperature controls, a timer, and a spacious interior for versatile cooking.

## Product Overview

### Professional Rotisserie Performance

This high-capacity electric rotisserie oven is engineered for consistent, professional-grade roasting results. Featuring an integrated convection system and adjustable temperature controls, it provides the versatility needed for uniform browning and efficient cooking. The user-friendly design includes a timer and a transparent viewing window, making it an ideal choice for high-demand commercial kitchen environments.

## Technical Specifications

Minimum Temperature	50 °C
Maximum Temperature	250 °C
Timer Range	60 min

## Key Features

### Key Features

- Integrated rotisserie spit for even roasting
- Convection hot air circulation system
- Transparent door for process monitoring
- Removable drip tray for simplified maintenance
- Adjustable temperature control knob

Capabilities	Roasting, Convection Baking, Rotisserie
