

# Electric Router for Engraving and Etching

This electric router is designed for engraving and etching applications. It operates on 220V at 50Hz, delivering a power of 1600W, and is equipped with a 12mm collet and a variable speed range from 0 to 23000 rpm.

## Product Overview

### Precision Electric Router

This high-performance electric router is engineered for precision engraving and etching tasks. With a robust 1600W motor and variable speed control, it offers the versatility needed for both professional workshop applications and detailed DIY projects. Its durable construction ensures stability and consistent results during operation.

## Technical Specifications

Rated Power	1600 W
Input Voltage	220V / 50Hz
Collet Capacity	12 mm

## Performance

### Performance Highlights

<b>1600 W</b> Power Output	<b>23000 rpm</b> Max Speed	<b>12 mm</b> Collet Size
No-Load Speed	0 - 23000 rpm	

## Features

### Build Characteristics

Robust Construction • Variable Speed Control • High Stability

### Suitable Applications

Engraving, Etching, Professional Woodworking, DIY Projects
