

Electric Sanitation Tricycle with High-Pressure Spray System

This electric sanitation tricycle is designed for efficient cleaning and disinfection. It features a large-capacity water tank and a high-pressure spray system.

Overview

Efficient Urban Sanitation Solution

This electric sanitation tricycle is a specialized vehicle engineered for effective cleaning and disinfection in urban environments. Featuring a compact three-wheeled chassis and a high-pressure spray system, it offers excellent maneuverability for navigating streets, parks, and public spaces. The electric motor ensures quiet, emission-free operation, making it an environmentally friendly choice for daily maintenance tasks.

Technical Specifications

Power Source	Electric Motor
Chassis Configuration	Three-wheeled

Key Features

Operational Features

- High-pressure spray system
- Adjustable spray nozzles
- Large-capacity water tank
- Comfortable operator seat

Environmental Impact

Zero Emissions • Low Noise Operation

Ideal Applications

Street Cleaning, Park Maintenance, Public Space Sanitation, Disinfection
