

Electric Scissors for Fiber Optic and Kevlar Cutting

These electric scissors are lightweight and easy to use for cutting various materials. They are capable of cutting paper, leather, cardboard, and fabric.

Product Overview

Professional Electric Cutting Solution

This portable electric scissor system is designed for high-efficiency cutting of diverse materials ranging from textiles to fiber optics. Featuring a durable tungsten steel blade, it offers both corded and cordless operation for maximum flexibility in industrial and household environments. The device combines low-noise performance with strong continuous work capacity, making it an ideal tool for anti-fatigue, precision cutting tasks.

Technical Specifications

Output Power

35 W

Power

Charger Voltage	240 V
Blade Material	Tungsten steel
Charging Time	2 hours
Machine Weight	0.376 kg

Performance & Capacity

Cutting Capacity by Material

Thickness	Materials
10mm	Underwear, cloth, textile, knitwear, felt, blanket, curtain
7mm	Five-layer cardboard, A4 paper (17 sheets)
5mm	Leather, carpet, plastic, fiberglass, rubber

Operation Modes	Corded, Cordless (Battery)
