

Electric Scooter Alloy Wheel

This electric scooter wheel is designed for optimal balance and a smooth riding experience. The alloy construction ensures durability and resistance to wear.

Product Overview

High-Performance Alloy Wheels

These electric scooter alloy wheels are engineered for durability, balance, and a smooth riding experience. Constructed from high-quality alloy, they are designed to withstand the rigors of urban commuting and recreational use. The robust design ensures stability and long-lasting performance, making them a reliable choice for various electric scooter models.

Technical Specifications

Model Specifications

Item Number	Rim Size	Brake Hub ID	Bearing Spec	Applied Tire
12015001	12x1.5	D95	6200	16x2.5
12015003	12x1.5	D80	6200	16x2.5
12012001	12x1.25	D80	6200	16x2.125
12015002	12x1.5	D205	35	16x2.5
12012002	12x1.25	D205	35	16x2.125

Key Features

Material	High-quality alloy
Design	Three-spoke design
Available Finishes	Black, Gold, Silver
