

Electric Scooter Motorcycle with EEC EURO 5 and COC Certification

This electric scooter motorcycle is certified with EEC EURO 5 and COC. It has L1e homologation and a maximum speed of 45km/h.

ADDITIONAL IMAGES

Overview

Ergonomic design suitable for daily urban commuting.

Urban Mobility Solution

This electric scooter is designed for efficient urban commuting, featuring full EEC EURO 5 certification and COC documentation for compliance with European standards. Engineered for reliability and safety, it includes a responsive braking system and integrated lighting. Its compact design and electric powertrain offer an eco-friendly and cost-effective alternative for daily transportation needs.

Performance

Equipped with foot pedals for added versatility.

Motor Power

650 W

Motor Power

Maximum Speed	45 km/h
Range Distance	55-65 km
Slope Capability	9 °

Technical Specifications

Clear digital display for monitoring speed and critical system metrics.

Robust construction featuring reliable braking systems.
