Overview

High-Performance Electric Mobility

This electric scooter motorcycle is engineered for efficient, eco-friendly urban commuting and recreational riding. Combining a sleek, aerodynamic design with a powerful electric drive system, it offers responsive acceleration and smooth handling for a comfortable experience. With advanced features like regenerative braking and integrated LED lighting, it serves as a sustainable and cost-effective alternative to traditional gasoline-powered vehicles.

Technical Specifications

Lighting System

- LED Headlights
- LED Taillights

Braking System

Front Disc Brakes, Rear Disc Brakes, Regenerative Braking
