

# Electric Scooter with Bosch Motor

This electric scooter is powered by a rechargeable lithium battery. It has a customized BOSCH motor with 350W and 800W power options.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Electric Mobility

This electric scooter is designed for sustainable and efficient micro-transportation. It features a customized high-power motor and a reliable lithium battery system, delivering a powerful and eco-friendly riding experience. With advanced safety protections and modern integrated technology, it offers a robust solution for urban commuting.

## Performance

### Motor Power Options

**350 W**

Standard Power

**800 W**

High Power

### Maximum Torque

**65 N.m**

350W Torque

**93 N.m**

800W Torque

## Battery System

### Battery Specifications

Feature	Detail
Voltage	48V
Capacity Options	20AH / 26AH
Cell Type	18650 Lithium

### Safety Protections

Over-discharge Protection, Overcharge Protection, Temperature Protection, Overcurrent Protection, Battery Equalization, Short Circuit Protection

## Technical Features

### Integrated Components

- LCD Dashboard
- LED Headlight

### Transmission

Two phrases chain transmission
