

Electric Scooter with Lithium Battery

This electric scooter is equipped with a 2000W motor. It also features a 72V 20Ah lithium battery.

Overview

High-Performance Urban Mobility

This electric scooter is engineered for efficient urban commuting and recreational use, combining a powerful 2000W motor with a high-capacity 72V 20Ah lithium battery. Its modern, aerodynamic design features a comfortable two-tone seat and sporty accents, making it a stylish choice for daily travel. Built with performance and safety in mind, it includes front disc brakes to ensure reliable stopping power in various city conditions.
