

Electric Sedan for Urban Transportation

This electric sedan is designed for urban environments. It features a high-capacity battery pack and regenerative braking.

Overview

Sustainable Urban Mobility

This electric sedan is designed specifically for efficient urban transportation, combining a sleek, aerodynamic profile with a focus on energy efficiency. Engineered for modern city environments, it provides a comfortable and practical driving experience while minimizing environmental impact. Advanced features like regenerative braking and driver-assistance systems ensure both safety and convenience for daily commuting.

Performance & Technology

Design Philosophy

Aerodynamic • Energy Efficient • Modern

Key Technology Features	Electric Powertrain, Regenerative Braking, Advanced Driver-Assistance Systems
Powertrain	Electric
